UI/UX Designer

I am a freelance UI/UX Designer and graduate student at the Maryland Institute College of Art pursuing a masters in UX Design. I received my bachelor's in computer science from the University of Maryland. Proficient with a breadth of design and development tools, I leverage my background as a programmer and 3 years as an IT Support Specialist alongside my unique aesthetic sense and love of art. I find creative, tech-driven design solutions.

Education

Maryland Institute College of Art, *Master of Professional Studies, UX Design*
Baltimore, MD – Expected Aug 2025

University of Maryland, *Bachelor of Science, Computer Science*
College Park, MD – May 2022

Work Experience

UI/UX Designer *Jan 2024 –*
Onword Studio, Inc.
Remote

- Redesigned company website with Figma, optimizing for improved user experience and elevated brand identity.
- Collaborated closely with the CEO to align design with the product vision resulting in a more creative and user-centric platform.
- Designed imagery and generated motion graphics with Adobe Creative Cloud and Procreate.

IT Systems Specialist *Jan 2023 – Jun 2023*
Montgomery County Public Schools
Rockville, MD

- Closed 95% percent of tickets submitted using ServiceNow on first call without escalation.
- Managed a cloud-based network of over 3000 devices including Windows and Chrome OS workstations, servers, and printers with Altiris and Azure.
- Provided customer assistance to a userbase including teachers, staff, students, and administration.

Art Instructor *May 2018 – Aug 2019*
Calleva Outdoors
Poolesville, MD

- Managed rotating teams of 3 to 5 staff through outdoor activities, team building, and leadership exercises for campers (aged six to thirteen) and staff including arts and crafts and river sports.

Volunteering

Student Volunteer   *May 2014 – Mar 2018*
Children's National Hospital
Washington, DC

- Assisted in administrative tasks and patient intake. Provided detailed meeting notes and compiled presentations to illustrate productivity data to the staff.
- Stoked a passion for life sciences by shadowing medical professionals across various fields. Observed surgeries, diagnostic procedures, and patient interactions. Interacted with medical data visualization software.

Projects

Portfolio Site 🔗
Web Developer
Figma, React.js, HTML, TailwindCSS

Designed, constructed, and deployed static web page using React.js with Next.js.

LilyHoney eCommerce Site Concept
UI Designer
Figma

Designed an interactive wireframe and high-fidelity mockups using Figma. Developed designs and branding for a web-based organic honey seller.

The Space Vampire Video Game
Creative Director, Front-End Developer
